

GRADUATE PROGRAMME AT HSSMI

HSSMI is a sustainable manufacturing innovation consultancy. We enable manufacturing companies to transform their competitiveness by helping them to scale up production, increase productivity, and integrate circular economy practices. Our ultimate goal is to boost the competitiveness of manufacturers through pathways to achieving net zero.

Here is a taste of what we do:

- ▶ Automotive assembly process development
- ▶ Battery assembly process development
- ▶ EDU process development
- ▶ Manufacturing strategy and engineering
- ▶ Logistics and supply chain planning
- ▶ Digitalisation of manufacturing processes and supply chains
- ▶ Circular economy

OUR SOLUTION AREAS

Our diverse team of engineers and consultants deliver highly innovative R&D programs and transformational consultancy projects with some of the most exciting manufacturing, technology, academic and governmental organisations.

Graduate Programme Introduction on 2nd March

We will host an online introduction to the Graduate Programme on 2nd March at 3pm. Please register your interest to attend by writing to Beverley.Stalton@hssmi.org.

HSSMI's Graduate Programme

Your career is your adventure. Working on industry leading projects of national importance, you will create and execute our clients' vision. This will be done using the latest technologies and thinking to support sustainable manufacturing growth in the UK and further afield. **The training, experience, and client exposure at HSSMI will focus on transforming you into an expert in your chosen field**

During the 2-year graduate programme, you will learn and develop your skills working on various projects. You will receive comprehensive training and an individual development plan to ensure you maximise your potential. You will receive support, coaching and feedback from your Line Manager mentors and colleagues.

We will support graduates towards achieving professional accreditation in their relevant field.

Our Benefits

It is not just the rewards and opportunities that make HSSMI an exciting place to build a career. You will also be supported by a friendly team, gain loads of useful experience along the way, and enjoy the following benefits:

- ▶ Salary of £28,000
- ▶ Hybrid working
- ▶ 8% non-contributory pension
